IN THE CLAIMS:

Please cancel claims 4 and 5 and amend claims 1 to 3 and 6 to 8 as follows:

1. (Amended) A **two-stage** transfer useful to impart **indicia** [indica] to **polyolefin products** [rotationally] molded **in a rotational mold at a molding temperature and ejected from the rotational mold at a demolding temperature less than the molding temperature, said transfer** [products] comprising:

- a. a carrier sheet of a flexible material having an **indicia** [indica] area for reception of said **indicia** [indica];
- c. an **indicia** [indica] coat, in a preselected **indicia** [indica] array, **consisting essentially** of a mixture of **indicia material** [indica] and hydrocarbon wax overlying said **indicia** [indica] area; and
- d. a top coat of a [top-coat,] pressure sensitive adhesive **which is substantially non-adhesive at ambient temperature and adhesive at said demolding temperature** substantially covering said **indicia** [indica] area and overlying said **indicia** [indica] coat; **and**

said indicia and top coats having melting temperatures less than said molding temperature.

2. (Amended) The transfer of claim 1 including a backing coat of a [backing-coat] pressure sensitive adhesive **which bonds to the carrier sheet at ambient**

temperatures and releases from the carrier sheet at said demolding temperature between said **indicia** [indica] coat and said carrier **sheet**, substantially covering said **indicia** [indica] area[;].

3. (Amended) The transfer of claim 2 wherein the **melting** [transition] temperature of the backing-coat pressure sensitive adhesive is **less** [greater] than **said molding temperature**. [that of the top-coat pressure sensitive adhesive.]

6. (Amended) The transfer of claim 2 wherein said backing and top coats extend peripherally beyond said **indicia** [indica] area, thereby encapsulating said **indicia** [indica] coat within said backing and top coats.

7. (Amended) The transfer of claim 2 wherein said **indicia** [indica] coat is a mixture of from 30 to 99 weight percent hydrocarbon wax and from 1 to 70 weight percent colorant.

8. (Amended) The transfer of claim 1 [2] wherein said polyolefin is polyethylene.

PLEASE ADD THE FOLLOWING CLAIMS:

16. The transfer of claim 1 wherein said top coat adhesive is a hydrocarbon resin.

17. The transfer of claim 2 wherein said backing coat adhesive is a hydrocarbon wax.
